Why Learn

Spanish?

¿Por qué aprender español?

Spanish in the business world

Spoken by over 400 million people throughout the world, Spanish is fast becoming one of the major languages of global commerce.

The nineteen Spanish-speaking nations of Latin America and Spain, along with a growing Hispanic population in the U.S., all offer a vast potential for trade and investment.

Increase your business potential by learning the language of your associates and clients in this large market.

Spanish in our local community

The Hispanic population is an integral part of the multicultural fabric of Toronto. This has strong implications for those who serve our diverse community.

Learning to communicate in Spanish will facilitate interaction and minimize language and cultural barriers within our large Hispanic community.

Our methodology

Metodología

Our program is specifically designed to develop effective communication skills.

We accomplish this by:

- focusing on relevant, real-life communication, using material from authentic, everyday scenarios;
- introducing vocabulary and grammar topics that are dictated by the communicative needs of students;
- using exciting, fun, interactive teaching techniques that include pair and group work; and
- incorporating important geographic, political and cultural information about Spanish-speaking countries.

Courses

Cursos

Courses can be **General** or **Targeted**.

The classes are:

- offered mornings, lunch times or afternoons; and
- conducted at your workplace in groups limited to eight students, to ensure interaction and personal attention.

Private instruction is also available.

1. General courses:

We offer eight levels: Beginners I and II; Intermediate I, II, III and IV; and Advanced I and II.

For each level, we provide two options:

Say it in Spanish, Once a Week: seven-week duration, 14 instructional hours.

Say it In Spanish, Twice a Week: five-week duration, 15 instructional hours.

Course materials are included.

2. Targeted courses:

Courses are specifically customized to meet the needs of your workplace. Our instructors:

- focus on the real-life situations you're likely to encounter in your work environment;
- assist you by recommending course material that is appropriate to your type of communication; and
- include authentic material from newspapers, magazines and other sources.
